

CS101C: Introduction to Programming (Using C)

Autumn 2025

Nikhil Hegde
Achyut Mani Tripathi

Week12: FileIO (contd..)

getchar

```
int getchar()
```

- reads a single character from the file stream that is standard input (i.e. your terminal).
- returns the character read or sets error indicator.

see `getchar.c` in codeexamples.

putchar

```
int putchar(int c)
```

- writes a single character `c` to the output stream that is standard output (i.e. your terminal).
- returns the error indicator and EOF is set.

see `putchar.c` in `codeexamples`.
